*According to the 1981 Alternative Nobel Prize winner Bill Mollison in his videos The Global Gardener 1991
(1) : Variable autonomy of +/- 20% depending on the type of soil and plants (situation, climate, etc.)
(2) : Tested by ASTREDHOR, Association nationale des Structures d'Expérimentation et de Démonstration Horticole
55 to 90% labour savings / Watering frequency depending on the ollas model. Reduction of weed control (observed but not measured).
